Exercise 1 (Derivatives)

Compute the derivatives for the following functions.

1. $f(x) = x$
2. Quadratic: $f(x) = x^2$
3. $g(x) = ke^x$
 - i. $g(x) = e^x$ [Hint: What do you notice in this subexercise?]
 - ii. $g(x) = 2e^x$

Hint: This is an example hint for the entire exercise.

Answer for subexercise 1.

Answer for subexercise 2.: Quadratic

Answer for subexercise 3.

- i. Test 1
- ii. Test 2

Exercise 2

Write a poem about purple elephants.

Answer for exercise 2

Hello here is my poem.
